

PUBLICATIONS IN PEER REVIEWED JOURNALS

1. Leftheriotis G., Syrrakostas, G., Yianoulis, P., Development of photoelectrochromic devices for dynamic solar control in buildings. *Solar Energy Materials and Solar Cells*, **94**(12) (2010), pp.2304-2313
2. Giannouli M, Syrrakostas G, Yianoulis P, Effects of using multi-component electrolytes on the stability and properties of solar cells sensitized with simple organic dyes. *Progress in Photovoltaics*, **18** (2010) pp. 128-136
3. Papaefthimiou S., Syrrakou E., Yianoulis P., An alternative approach for the energy and environmental rating of advanced glazing: An electrochromic window case study. *Energy and Buildings* **41** (2009) 17–26
4. Syrrakostas G., Giannouli M., Yianoulis, P. Effects of paste storage on the properties of nanostructured thin films for the development of dye-sensitized solar cells. *Renewable Energy* **34** (2009) 1759–176
5. Yianoulis P, Giannouli M, Thin Solid Films and Nanomaterials for Solar Energy Conversion and Energy Saving Applications Source. *Journal of Nano Research*, **2** (2008) pp. 49-60
6. Leftheriotis G., Yianoulis P. Development of electrodeposited WO₃ films with modified surface morphology and improved electrochromic properties. *Solid State Ionics* **179** (2008) 2192–2197
7. Pierre-Yves Pennarun, Spiros Papaefthimiou, Panayiotis Yianoulis, Patric Jannasch. Electrochromic devices operating with electrolytes based on boronate ester compounds and various alkali metal salts. *Solar Energy Materials & Solar Cells* **91** (2007) 330–341
8. G. Leftheriotis, S. Papaefthimiou, P. Yianoulis. Dependence of the estimated diffusion coefficient of Li_xWO₃ films on the scan rate of cyclic voltammetry experiments. *Solid State Ionics* **178** (2007) 259–263
9. S. Papaefthimiou, G. Leftheriotis, P. Yianoulis, T.J. Hyde, P.C. Eames, Y. Fang, P.-Y. Pennarun, P. Jannasch. Development of electrochromic evacuated advanced glazing. *Energy and Buildings* **38** (2006) 1455–1467
10. P.-Y. Pennarun, P. Jannasch, S. Papaefthimiou, N. Skarpentzos, P. Yianoulis. High coloration performance of electrochromic devices assembled with electrolytes based on a branched boronate ester polymer and lithium perchlorate salt. *Thin Solid Films* **514** (2006) 258–266
11. A. Siokou, S. Ntais, V. Dracopoulos, S. Papaefthimiou, G. Leftheriotis, P. Yianoulis. Substrate related structural, electronic and electrochemical properties of evaporated CeO_x ion storage layers. *Thin Solid Films* **514** (2006) 87–96
12. Papaefthimiou S., Syrrakou E., Yianoulis P. Energy performance assessment of an electrochromic window. *Thin Solid Films* **502** (2006) 257 – 264
13. E. Syrrakou, S. Papaefthimiou, P. Yianoulis. Eco-efficiency evaluation of a smart window prototype. *Science of the Total Environment* **359** (2006) 267–282
14. Chochos C.L., Govaris G.K., Kakali F., Yiannoulis P., Kallitsis J.K., Gregoriou V.G. Synthesis, optical and morphological characterization of soluble main chain 1,3,4-oxadiazole copolyarylethers - Potential candidates for solar cells applications as electron acceptors. *Polymer* **46** (2005) 4654–4663
15. Economopoulos S., Chochos C.L., Govaris G.K., Yiannoulis P., Kallitsis J.K., Gregoriou V.G. Bulk heterojunction photovoltaic cells from polymer mixtures with soluble oxadiazole and quinoline polymers as electron acceptors. *Materials Research Society Symposium Proceedings* **836** (2005) Article number L5.16, Pages 143-148
16. Syrrakou E., Papaefthimiou S., Skarpentzos N., Yianoulis P. Electrochromic windows: Physical characteristics and environmental profile. *Ionics* **11**, (2005) Pages 281-288
17. E. Syrrakou, S. Papaefthimiou, P. Yianoulis. Environmental assessment of electrochromic glazing production. *Solar Energy Materials & Solar Cells* **85** (2005) 205–240.
18. Economopoulos S.P., Govaris G.K., Chochos C.L., Tzanetos N.P., Andreopoulou A.K., Kallitsis J.K., Yianoulis P., Gregoriou V.G. Synthesis and Characterization of Conjugated

Polymers and Their Blends for Optoelectronic Applications. *Macromol. Symp.* **205** (2004), pp.19–31

19. G. Leftheriotis, S. Papaefthimiou and P. Yianoulis. The effect of water on the electrochromic properties of WO_3 films prepared by vacuum and chemical methods. *Solar Energy Materials & Solar Cells* **83** (2004) 115–124.
20. A. Siokou, S. Ntais, S. Papaefthimiou, G. Leftheriotis and P. Yianoulis. Influence of the substrate on the electrochromic characteristics of lithiated $\alpha\text{-WO}_3$ layers. *Surface Science* **566–568** (2004) 1168–1173.
21. P. Yianoulis and M. Giannouli. Review of Current Status and Prospects for Photovoltaic Solar Energy Applications. *World Resource Review*. **15** (2003) pp 52 – 65.
22. G. Leftheriotis, S. Papaefthimiou, P. Yianoulis, A. Siokou, D. Kefalas. Structural and electrochemical properties of opaque sol-gel deposited WO_3 layers. *Applied Surface Science* **218** (2003) 275-280.
23. Tripanagnostopoulos Y, Nousia T, Souliotis M, Yianoulis P. Hybrid photovoltaic/thermal solar systems. *SOLAR ENERGY* **72** (3): 217-234 2002
24. Siokou, G. Leftheriotis, S. Papaefthimiou, P. Yianoulis. Effect of the tungsten and molybdenum oxidation states on the thermal coloration of amorphous WO_3 and MoO_3 films. *Surface Science* **482-5** (2001) 294.
25. S. Papaefthimiou, G. Leftheriotis, P. Yianoulis. Advanced electrochromic devices based on WO_3 thin films. *Electrochimica Acta* **46**, **13-14** (2001) 2145.
26. Leftheriotis, S. Papaefthimiou, P. Yianoulis, A. Siokou. Effect of the tungsten oxidation states in the thermal coloration and bleaching of amorphous WO_3 films. *Thin Solid Films* **384** (2001) 298.
27. S. Papaefthimiou, G. Leftheriotis and P. Yianoulis. Study of WO_3 films with textured surfaces for improved electrochromic performance. *Solid State Ionics* **139** (2001) 135-144.
28. G. Leftheriotis, P. Yianoulis: Thermal properties of building materials evaluated by a dynamic simulation of a test cell. *Solar Energy*, **69** (2000) 295.
29. Y. Tripanagnostopoulos, P. Yianoulis, S. Papaefthimiou and S. Zafeiratos. CPC Solar collectors with flat bifacial absorbers. *Solar Energy* **69**, Vol. 3 (2000) 191.
30. G. Leftheriotis, S. Papaefthimiou and P. Yianoulis. Development of multilayer transparent conductive coatings. *Solid State Ionics* **136-137** (2000) 655.
31. Leftheriotis G., Papaefthimiou S., Yianoulis P. Integrated low-emittance electrochromic devices incorporating ZnS/Ag/ZnS coatings as transparent conductors. *Solar Energy Materials and Solar Cells* **61** (2000) 107.
32. D. Patrikios, P. Yianoulis. A flexible stand alone system for PV testing and evaluation World Renewable Energy Network N°6, ISBN 0-080-43865-2, (2000), pp. 2131-2134
33. Papaefthimiou, G. Leftheriotis and P. Yianoulis. Study of electrochromic cells incorporating WO_3 , MoO_3 , $\text{WO}_3\text{-MoO}_3$ and V_2O_5 coatings. *Thin Solid Films* **343** (1999) 180-184.
34. P. C. Eames, B. Norton, Y. Tripanagnostopoulos, P. Yianoulis. Modeling line- axis solar concentrators in the medium temperature range. *Renewable Energy*, **16** (1999) 743-748.
35. Y. Tripanagnostopoulos, P. Yianoulis, S. Papaefthimiou, M. Souliotis and Th. Nousia. Cost effective asymmetric CPC Solar Collectors *Renewable Energy* **16** (1999) 628.
36. P. W. Griffiths, M. Di Leo, P. Cartwright, P. C. Eames, P. Yianoulis, G. Leftheriotis and B. Norton. Fabrication of evacuated glazing at low temperatures. *Solar Energy*, **63** (1998) 243
37. G. Leftheriotis, P. Yianoulis and D. Patrikios. Deposition and optical properties of optimized ZnS/Ag/ZnS thin films for energy saving applications. *Thin Solid Films* **306** (1997) 92
38. G. Leftheriotis and P. Yianoulis. Characterization and stability of low emittance multiple coatings for glazing applications. *Solar Energy Materials and Solar Cells*, **58** (1999) 185-197.
39. S. Papaefthimiou, G. Leftheriotis, P. Yianoulis. Electrochromic Phenomena in Transition Metal Oxide Thin Films Prepared by Thermal Evaporation, *Ionics* **4** (1998) 321.

40. S. Baskoutas, A. Jannussis, and P. Yianoulis. Displaced squeezed number states of the phonon field in polar semiconductors. *Phys. Rev. B*, Vol **54**, (1996) 8586.
